Look-up table with two inputs, built from NMOS pass transistors
Y = T[2 B + A], table T3 T2 T1 T0 = 0110

Supply

Inputs

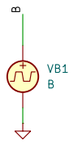

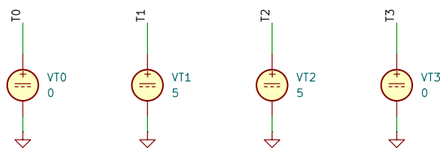

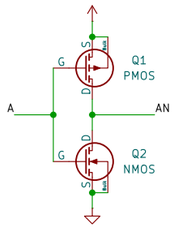

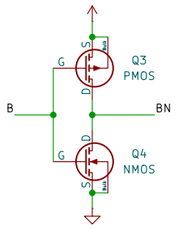

Table bits T0..T3 (in an FPGA: SRAM cells)

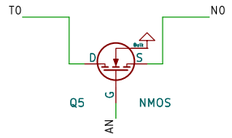

Inverter: AN = not A

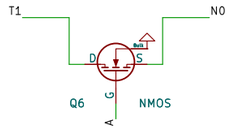

Inverter: BN = not B

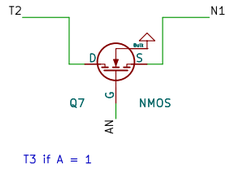

Level 1: T0 if A = 0

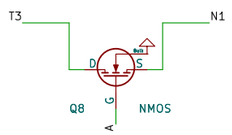

T1 if A = 1

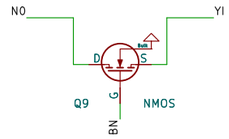

Level 1: T2 if A = 0

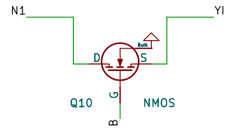

T3 if A = 1

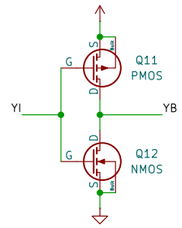

Level 2: N0 if B = 0

N1 if B = 1

Buffer, first stage

Buffer, second stage: Y
